Primary Care Visits

- Patients who first contact Medina Community Clinic for physician visits will be directed to an affiliate hospital, FQHC (federally qualified health center) facility, or outpatient affiliate to complete an initial primary care visit. An initial primary care visit is needed for basic evaluative and diagnostic measures.
- Current Major Medina Community Clinic Affiliates:
 - Henry J. Austin Health Center (FQHC of Mercer County)
 - Capital Health Regional Medical Center
 - St. Francis Medical Center
 - Robert Wood Johnson University Hospital-Hamilton
 - Cherry Hill Free Clinic
- A primary care physician will:
 - Complete an initial examination
 - Prescribe required tests
 - Complete referrals for specialty visit(s)
 - Note: Referrals are faxed to the Patient Care Navigator, not given to patient directly
- Patients without health insurance are advised to apply to an affiliate's charity care program. To enroll, the patient must bring the following to his/her appointment at the facility:
 - **Identification**
 - Ex: driver's license, state/county ID, Social Security Card, birth certificate
 - **Proof of NJ Residency**
 - Ex: utility bill, phone bill, valid driver's license
 - **Asset Information**
 - Ex: bank statement for checking/savings account
- Once the primary care visit has occurred and procedural and referral orders have been issued from the attending physician, the Patient Care Navigator (PCN) of Medina Community Clinic will begin the process of scheduling the patient for specialty visits
